AWWA C207 Gasket Specification

Please fill out the appropriate sections of the following form in order for APS to manufacture your gasket correctly.

NOTE: Please fill out Section A, B, D and E. Only fill out Section C if shoulder bolts are used. For valves, please provide the valve ID in Section A.

Form with sections: SECTION A Type of Flanges, SECTION B What is the size?, SECTION C If shoulder bolts are used, what is the diameter of the shoulder?, Section D Select Type of Gasket Needed, Section E Type of Material Needed. Includes checkboxes for material types like Phenolic, Nitrile, Viton, PTFE, EPDM, and diagrams of gasket types E and F.
